

Writing About Symmetry “Correspondence” Pairings

Complete the following for each of your two symmetrical pairings:

1. Title or Label the Relationship of your two paired photos.
2. Describe the process by which you recognized the opportunity to communicate with this pairing.

Example:

Stop and Go Exits

I recognized the green exit sign as I exercised on a stationary bike. It occurred to me that most exit signs are red, so I began to wonder about the green lighting. It then occurred to me that if I paired them together, the symbolic opposites of red and green could communicate in opposite ways. Green is welcoming and, as a traffic light, directs drivers to go. Red, on the other hand, is generally a warning, and directs drivers to stop.
